

# HERCULES® HV SERIES

## VANDAL RESISTANT DECORATIVE SURFACE MOUNT

- Decorative wall/ceiling mount
- Rugged polycarbonate lens
- Tamper resistant hardware
- Heavy-duty cast aluminum
- Durable powder paint finishes
- Various architectural styles

Hubbell Lighting

# DESIGNED TO LAST

## THE HERCULES™ HV SERIES

Rugged. Decorative. Energy efficient. The Hercules HV Series presents an aesthetic lighting solution for unsupervised locations where vandal resistance is a priority. Two sizes provide proper perspective for mounting heights from 6 to 15 feet. Select from several styles, sources and finishes for either wall or ceiling mounting locations.

### RUGGED

Cast aluminum housing and face trims provide solid mounting and overall durability. The opal polycarbonate lens provides even illumination and resistance to impact. Tamper resistant hardware included. Units are certified for wet locations.

### DECORATIVE

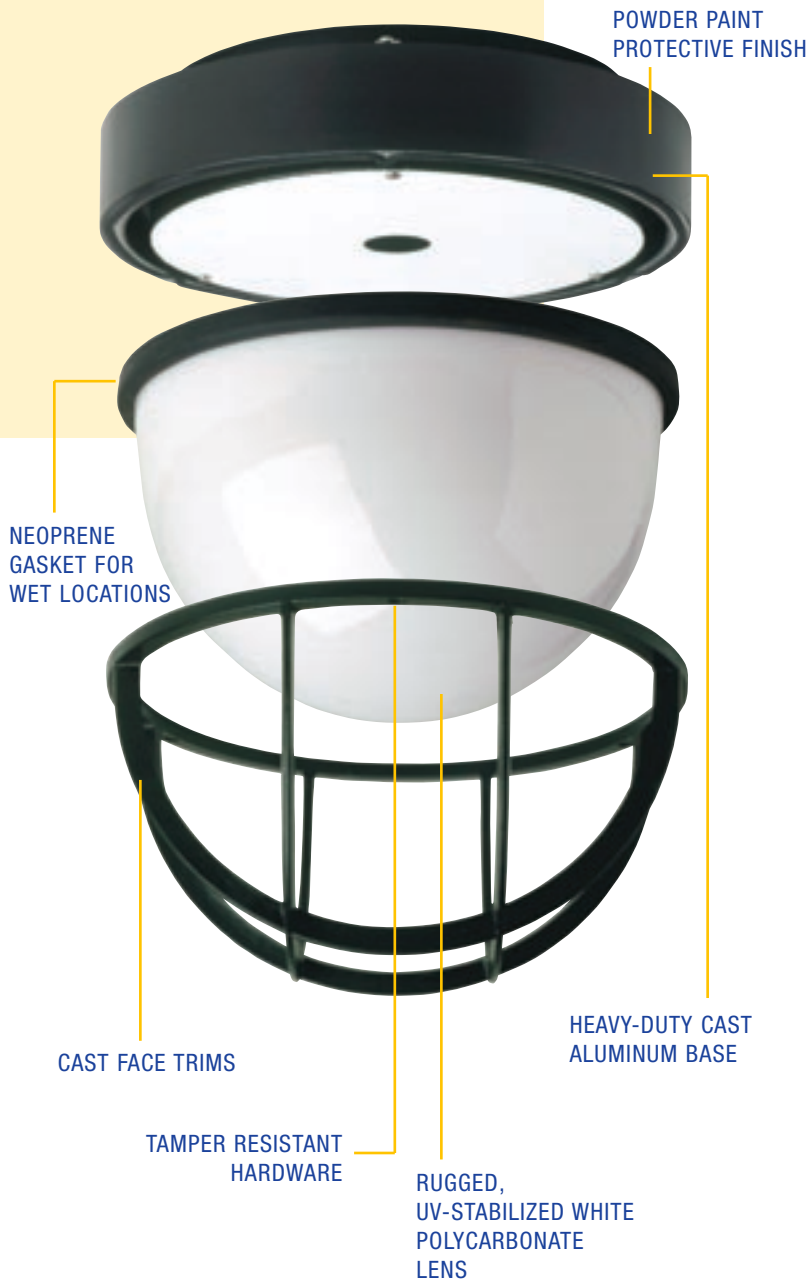

Hercules' classic round geometric shape is accented by trims designed to complement a variety of architectural styles. From a basic opal lens to guards, spokes, or partial hoods, you can create the style you desire. Durable powder paint finishes protect your investment and are available to match or accent your building's color scheme.

### ENERGY EFFICIENT

Sources range from incandescent to metal halide. The HVS small series features low wattage compact fluorescent, 50 watt HPS, and 60 watt incandescent. The larger HVL series offers 70 and 100 watt metal halide and HPS along with (2) 26 watt fluorescent. These combinations offer long life, low maintenance and energy efficiency.

### VERSATILE

Hercules can be used on both wall and ceiling applications. The two sizes provide the proper perspective for six to eight foot or 10 to 15 foot mounting locations. The source range offers "white" light in metal halide, fluorescent, or incandescent as well as HPS for basic security lighting. The various face trims provide different fixture styles and add to the fixture's durability. Typical applications are entries, perimeter wall accent and security, canopies, and corridors. Typical sites are schools, public buildings, hotels, retail malls, and unsupervised locations where a decorative unit is desired.
