

Laramie LFS

Compact Decorative Flood

FLOODLIGHTING

The LFS Series is the wide, uniform beam lighting solution for sign, façade and general lighting of smaller areas. The die cast construction is not only rugged but has new styling that matches the larger Laramie 400 and other fixtures in the "Southwest" family.

A wide variety of lighting systems is offered, including pulse start metal halide, compact fluorescent, high pressure sodium, and LED packages. These systems allow the designer a wide range in lumen, energy and maintenance considerations.

Cataloged in five standard finishes, the LFS fixture can be ordered to blend or contrast with most architectural elements. The Lektrocote® powder paint system features 800 Series powder for long life and minimum surface change.

Units are shipped less lamp as standard but lamps are available if desired along with button photocontrols for dusk-to-dawn energy savings. PS and HPS fixtures have medium base sockets.

CSA certified to UL 1598, suitable for use in wet locations.
